

Expression Pedal

KEP100 / 13147

Features and Benefits

The KEP100, as durable as it is versatile, offers everything you expect in an expression pedal. Designed to work with virtually any keyboard or synthesizer, electronic features include a polarity switch for instrument accommodation, a 6' attached 1 / 4" TRS cable for easy interface, and a scalable control knob to adjust expression range. In addition, the reliable chassis, smooth-operating cam and textured, slip-resistant rubber surface ensure the KEP100 performs reliably in the studio or on the road. Built to withstand the punishment that comes with the job, the KEP100 gives keyboardists the action, and intuitive feel they require for exact musical expression.
