

USB-Rechargeable Orchestra Light

LED518 / 14221

Features and Benefits

Our LED518 USB Rechargeable Orchestra Light features a wide lamp head that illuminates two side-by-side pages of sheet music without overspill or hot spots. Two levels of brightness accommodate a variety of lighting requirements, and, to preserve stage optics, the lampshade blocks light from reaching the audience. For adaptable and precise positioning, the lamp head is supported by a flexible gooseneck. The versatile base enables use nearly anywhere because it clips to music stands and other gear or rests upright on a flat surface. The rechargeable battery never needs replacing and charges via any available USB port, including the port on a phone charger, laptop, or portable power bank.

Product Specifications

Application: Sheet music / orchestra stand

Lamp Qty: 1

LED Qty: 18

Button: Bright/dim/off

LED Color: 6000K White

Lumens: 430

Power: USB adapter (included)
