

Mini Speaker Stand Pack

On-Stage®

SSP7000 / 14267

NEW PRODUCT

Features and Benefits

Our SSP7000 Mini Speaker Stand Pack comes with everything needed to support two speakers on individual stands. Lightweight and compact, these stands complement the portability of PA rigs that use small speakers. The stands adjust in height to accommodate a variety of venues and applications and feature an upper shaft that supports all standard 1 3/8" speaker cabinet mounting sockets. To adapt to available floor space, the base spread expands and contracts. Heavy-duty construction, braced bases, and nonslip feet work together to deliver exceptional stability and load balance. The durable black finish preserves the professional appearance of any space. For convenient storage and ergonomic transportation, the tripod bases fold flat and all the components fit into an included carrying bag with backpack-style straps and top handles.
