Elite Series

PORTABLE PA & CONCERT SPEAKERS

Samson | Anchor

Samson's Expedition series speakers are lightweight and portable. The XPL200 features a 200W amplifier, powered by AC or optional battery. The XPL300 adds a 4 channel stereo mixer, 24-bit effects, and a built-in iPod deck. The XP40i/XP40iw are compact, 2 channel, battery powered sound systems, complete with iPod docks. The XP40iw includes a built-in wireless handheld mic system.

Samson's Resound HD loudspeakers provide premium audio performance at an affordable price. The RS12HD, RS15HD and RS215 full-range models are designed for demanding front of house duties, covering audiences of different sizes, while the RS12mHD and RS15mHD are dedicated floor wedges for live stage monitor applications.

The Live! series from Samson delivers active 2-way power for demanding live sound applications. Optimax circuitry applies independent compressors/limiters to each amplifier, resulting in maximum volume level without distortion or clipping. The input sections of each model features balanced mic and line level inputs, two-band EQ's, and XLR extension jacks with Mix/Thru switch.

Samson's Auro loudspeakers are engineered for power, portability, and exceptional sound. Features include 2-band EQ's, line outputs, Optimax compression/limiting with two-stage speaker protection, dual angle wedge positions, and solid polypropylene construction.

Samson dB Series subwoofers utilize active stereo crossovers with high-pass outputs for running powered satellite speakers. Features include 3/4" plywood construction, steel corners, large casters and 35mm pole mount receptacles. They are ideal for augmenting any sound reinforcement system where strong low-end is desired.

Anchor Audio Portable Sound Systems

Designed for portability and ease-of-use, Anchor public address systems deliver loud and clear performance without the need for specialized technical training. Systems range from the ultra-compact Explorer Pro to the 6' tall, wireless mic/MP3-equipped Beacon system, and TMP Pro has them all.

Call TMP Pro for specs and pricing!

The Power of Ten.

The All New Expedition 510i.

Delivering roadworthy sound in a unique, pack-and-go design, Expedition features a 10-channel, 500-watt Class D mixer with digital effects and an iPod dock. Its vented enclosures use 10-inch woofers and 1-inch titanium tweeters for rich bass and crystal clear highs. With Expedition, portable perfection is easier than ever.

dB Technologies' Opera Series puts state-of-the-art technology in an affordable package. Advanced features include digipro™ digital amplification, Power Factor Correction, DSP control, dual active limiters, asymmetrical horns, and low-noise reflex ports. The polypropylene enclosures allow versatile placement as floor monitors, satellites, or pole-mounted full-range systems.

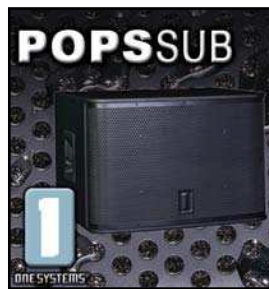

dB Technologies is known for subwoofers. These active models provide powerful low-end for rendering kick drums with high SPL's. All models feature an integrated system controller allowing operation in mono or stereo modes. It also offers phase settings and two cut-off frequencies at 90Hz and 120Hz. The ideal low frequency companion for Opera Digital Series full-range speakers.

One Systems IM models are compact, direct-weather systems. They are ideal for outdoor installations as well as for indoor applications where high vocal intelligibility and musical accuracy are required. Enclosures are molded from a special copolymer designed to handle high UV exposure and harsh weather environments. All hardware is made from stainless steel or high-grade aluminum.

POPS is a powered, high output, portable system featuring Powersoft™ amplification and processing. POPS can be used outdoors in rain, snow and temperature extremes and is ideal for sporting events, festivals, and high-level music playback. Both models come with 100' AC and XLR-type signal cables on reels. POPSSub also includes a crank-up-style, height-adjustable mounting pole for elevating the POPS15.
