

SPEAKER MANAGEMENT

## The dbx DriveRack® Family

An audio management solution exclusively from the engineers at dbx. Ask a TMP Pro rep today about any dbx DriveRack system.

### DriveRack® PX Powered Speaker Optimizer

Designed specifically for the purpose, the DriveRack PX gets maximum performance out of active speakers. Stereo feedback elimination, dual 20-band EQ, subharmonic synth, multiband parametric EQ, PeakPlus™ limiters, auto-EQ, RTA, 2-channel XLR input/output/sub output, combine to make powered systems sound better than ever.

Inv#	Model#	List	M.A.P.
50609	DriveRack PX	2in/4out/EQ/Dynamics/AFS/RTA/Crossover	599.95 399.95

### DriveRack® PA+

Replacing the successful DriveRack PA, the PA+ offers easy setup, reliability and unparalleled sound quality. Exclusive Set Up Wizards walk users through system set up with easy to follow step-by-step instructions. An extensive built-in list of JBL speakers and Crown amplifiers can be automatically fine-tuned. Features include Advanced Feedback Suppression (AFS), sub-harmonic synth, input/output dynamics, full-time RTA, pink noise generator, extensive crossover options, graphic/parametric EQ, output delay, USB updates, and more.

Inv#	Model#	List	M.A.P.
55475	DriveRack PA+	2in/6out/EQ/Dynamics/AFS/RTA/Crossover/USB	749.95 499.95
29582	RTA-M	Measurement Microphone for DriveRacks	149.95 99.95

### dbx ZonePRO DSP's

dbx ZonePRO's offers complete control and processing of multi-zone audio systems. Features include paging microphone functions like gating, de-essing, automatic gain control, and ducking, plus audio management processing like feedback suppression, compression, limiting, bandpass filtering, crossover, parametric EQ, security lockout, Ethernet control, wall panel control, and more. Secure versions feature a blank front panel, requiring control changes to be made via PC connection. "M" models can be linked via Ethernet. All models provide balanced Euro-type outputs. Input connections are via balanced mic/line Euro-type connectors and RCA source connectors. ZonePro 1260, 1260m, 1261, and 1261m also provide a coaxial S/PDIF input for digital audio connections.

Inv#	Model#	List	M.A.P.
36779	ZonePRO 640	6input/4output/Mixer/EQ/Dynamics/Crossover	1399.95 999.95
58214	ZonePRO 640m	Same with 4 Euro in's, 2 stereo RCA in's, Ethernet	1499.95 1099.95
36415	ZonePRO 641	6input/4output/Mixer/EQ/Dynamics/Crossover/Blank Faceplate	1199.95 799.95
58215	ZonePRO 641m	Same with 4 Euro in's, 2 stereo RCA in's, Ethernet	1299.95 899.95
36887	ZonePRO 1260	10input/6output/Mixer/EQ/Dynamics/Crossover	1899.95 1399.95
58216	ZonePro 1260m	Same with 6 Euro in's, 4 stereo RCA in's	1999.95 1499.95
40715	ZonePRO 1261	10input/6output/Mixer/EQ/Dynamics/Crossover/Blank Faceplate	1699.95 1199.95
58217	ZonePro 1261m	Same with 6 Euro in's, 4 stereo RCA in's, Blank Faceplate	1799.95 1299.95

### dbx DriveRack® 260 Speaker Management

The 260 exceeds the processing power of the DriveRack PA+, providing more EQ, dynamics, and crossover options. Additionally, up to 2.7 seconds of delay are available. It also provides a RS-232 port for computer display, configuration, and upgrading.

Inv#	Model#	List	M.A.P.
29826	DriveRack 260	2in/6out/EQ/Dynamics/AFS/RTA/Crossover	1299.95 999.95

### dbx DriveRack® 4800/4820

Flagship of series, the 4800 is designed for sophisticated concert and install systems. It adds a 96kHz DSP engine, full color display, digital I/O, and signal routing to the full suite of DriveRack speaker management tools.

Inv#	Model#	List	M.A.P.
50014	DriveRack 4800	4in/8out/EQ/Dynamics/AFS/RTA/Crossover	5299.95 3999.95
55794	DriveRack 4820	Secure version with blank faceplate	4299.95 3199.95

### dbx DriveRack® 220i System Processor with AFS

The 220i is specifically designed for installations. It features GUI control, a 2ch matrix mixer, graphic/parametric EQ, AFS, auto-gain control, de-essing, ducking, subharmonic synth, Comp/Lim/Gate, and remote control via wall-mounted Zone Controllers.

Inv#	Model#	List	M.A.P.
34711	DriveRack 220i	2in/2out/Mixer/Processor/Advanced Feedback Suppression	899.95 629.95

### System Core Matrix Processors

The new flagship products for Digital Matrix Processing. Features include flexible routing, expansion via I/O cards including a high speed/high bandwidth slot, AFS, Ambient Noise Compensation, priority ducking, parametric EQ's, delay, and dynamics. Control options include HiQnet™ System Architect, Ethernet, serial, contact closure, popular ZC wall controllers and even automatically scheduled events.

Inv#	Model#	List	M.A.P.
58220	SC 32	Up to 32 in/out, requires cards	3515.00 2811.43
58221	SC 64	Up to 64 in/out, requires cards	5515.00 4411.43
58222	SC A-8IN	8ch Analog Input Card	258.00 205.71
58249	SC A-8OUT	8ch Analog Output Card	258.00 205.71

**dbx** PROFESSIONAL PRODUCTS

You've specified the perfect speakers and amplifiers, now get the right System Management tools. dbx DSP's have the features and flexibility you need to get the best performance out of any audio system, and they have the easy control options your clients need for trouble-free operation. Call your TMP Pro rep to learn how dbx DSP's can enhance your next installation.
