700 Series Mixer/Amplifiers
700 series mixer/amps offer 6 Phoenix mic/line inputs with phantom power, 2 dual RCA aux inputs, and a module slot for optional features. Telephone paging, assignable auto-mute priority, insert jacks, and volume control security knobs make this series ideal for background, foreground, and paging applications.

900 Series Amps

The industry standard in installed sound amplifiers. These modular models feature configurable slots compatible with over 50 TOA plug-in modules. Rack versions feature multiple paging priorities, aux output, bass/treble controls, and remote master volume terminals. Wall mount models feature 9-band EQ's, HP/LP filters, compression, and more.

BG-200 Series Mixer/Amplifiers
Both models in the BG-200 series offer a simple and cost-effective solution for adding powered zones to an existing system, as well as powering speakers in applications that require a line input from a mix or playback source. The BG-200 Series Amplifiers are UL approved and backed by TOA's 5 year warranty.

BG-1015 5-Channel Mixer/Amplifier
TOA's BG-1015 compact 5 channel mixer/amplifier offers remarkable features in a small chassis. Microphone page input with +24V, telephone page input, program input, aux input, MOH output, 1W 8C zone output, auto-mute, bass/treble controls, and insert jacks are just some of the features. Its 900 series module port allows for a variety of input/output options.

42319	C20	3ch/20W/4C/8C/16C/25V/70V.....	374.75 N/A

BOGEN Classic 4-Channel Mixer Amplifiers
Bogen's Classic Series mixer amplifiers allow mixing of microphone, telephone, and aux sources. Screw terminals provide output to low impedance and transformer-coupled speakers. Each of the 4 inputs has its own volume control. Additional features include treble/bass control, aux muting, vox muting, and audio output.

Atlas Strategy Series Mixer Amplifiers
The AA35/60 are designed for distribution systems that may require MOH and paging. They have been used with great success in speech privacy, classroom, and BGM systems. The AA120/120M/240 provide extensive muting and output options, along with a bridging feature for room combining applications. The 120M has a single module bay as well as 24VDC output and 3 zone matrixing.
