

Guitar Capo

GA100 / 10139

Features and Benefits

Need to transpose a song? No problem. Simply clamp on the GA100 quick change guitar capo and play like you would without it. You'll use the same chord fingerings as always, but now you are in a different key. The spring-loaded design is far easier to use than strap or thumb screw styles. The GA100 is so easy to use, in fact, removing it mid-measure for a key change is no problem at all. Diecast zinc alloy provides the necessary rigidity, while silicone padding provides uniform pressure and protects the neck / fingerboard.

Specifications

Application: Guitar

Material: Diecast zinc alloy

Padding: Silicone

Color: Black
