

# Adjustable Slat Wall Guitar Hanger

GS7650AB / 10747

## Features & Benefits

A showroom staple, our Adjustable Slat Wall Guitar Hanger hangs a guitar facing left, right, or straight ahead on a hinged yoke. Designed for efficient use on slat wall, the top lip inserts directly into the wall slot and balances on the lower baseplate. The position on the wall is easily changed by simply sliding the hanger where you want it. EVA rubber padding on the yoke's contact points provides a slip-free hold and protects guitars from dings and scratches. Available in a black finish.
