

Heavy-Duty Mic Stand with 10" Base

MS9210 / 11492

M20 THREADED

Features and Benefits

With a 10", 6-pound low profile base, the MS9210 is an excellent choice for any handheld microphone. It is well suited as a lead vocal / soloist stand, and its smaller 10" base makes it perfect for backing vocals, a cappella, and other closely grouped applications. Its steel shafts measure 7 / 8" and .625" in diameter like most common portable stands, but its heavy-duty mid-point clutch is extraordinarily robust. Connection of the lower shaft to the base is via a solid steel machined lug with M20 threading and locking washer. This coarse threading provides an excellent combination of fast assembly and secure connection, while extending thread wear far beyond fine-thread designs.

Specifications

Height: 36"-65"

Base Vertical Height: 10"

Base Weight: 6 lbs.

Upper Threading: .625"-27"

Base Threading: M20

Color: Black
