

# Ball-Joint Mic Adapter

MM01 / 11741

## Features and Benefits

Precise mic placement has never been easier. Use the MM-01 with any standard mic clip, shock mount, stereo bar, or self-mounting microphone. The MM-01's ball joint provides 360 degree rotation and 180 degree tilt, making fine-tuned mic positioning a breeze. The ball joint itself features a textured finish, so the locking mechanism holds fast even with heavy microphones. Great for percussion, guitar amps, acoustic guitars, stereo recording schemes, and personal mixers.

## Specifications

**Application:** Adds adjustability to .625" applications

**Weight Capacity:** 6 lbs

**Tilt Angle Adjustment:** 180 degrees

**Rotational Adjustment:** 360 degrees

**Color:** Chrome
