

Flip-It!® Gran Guitar Stand

GS7153B-B / 12514

Features and Benefits

The Flip-It!® Gran Guitar Stand is one of the safest stands on the market, providing two guitar protection methods. The upward-angled lower yoke prevents forward movement of the guitar. The upper Flip-It!® yoke operates ergonomically with one hand, flipping down when a guitar is placed in the stand and automatically springing back up to lock the neck in place, preventing tips and falls. EVA foam padding at the contact points protects guitar finishes. The stable tripod base folds down and the lower yoke detaches, enabling compact storage and transportation.

Specifications
