

Hex-Base Studio Boom Microphone Stand

SMS7650 / 12624

ON-STAGE ORIGINAL M20 THREADED

Features and Benefits

This versatile Hex-Base® Studio Boom Mic Stand features two straight boom shafts. The primary boom is perfect for close miking. Attaching the short extension boom to the primary boom enables precise overhead mic placement with an extra level of angle adjustment. A counterweight balances attached mics for ease of positioning while ergonomic tension knobs and clutches lock in length and angle adjustments. Telescoping base shafts offer many height options while the heavy base provides exceptional stability, even when rolling on its removable casters.
