- Selectable PTT or latching button modes
- ISO restrict mode
- Internal antennas
- Lithium-Ion rechargeable batteries with up to 20 hours of operation
- User voice prompts
- Rugged construction

DX210 2.4GHz Digital Wireless Intercom

The DX210 is a two-channel system that delivers a perfect blend in performance, connectivity with wired systems, and ease of use. The two separate 2-wire and 4-wire connections make it highly compatible with any industry-standard

2-wire intercom systems or 4-wire intercom/audio devices. Each BS210 base station can support up to four full-duplex beltpacks and/or WH220 all-in-one wireless headsets for talk and listen capabilities or

11 half-duplex beltpacks for listen-only purposes. By linking four base stations together, up to 16 full-duplex or 44 half-duplex beltpack users can be in communication.

System Highlights:

- Wireless ISO talk-around
- Digital auto nulling (front panel access)
- Two separate 2-wire/4-wire connections
- Triple diversity – space, time and frequency – supporting extreme multi-path environments
- Spectrum-friendly technology
- Relay (GPIO) actuation with ISO function
- Feedback protection for un-terminated 2-wire channels
