

Ukulele Humidifier

GA250 / 13431

Features and Benefits

Changes in humidity can wreak havoc with even the most sturdily-built instrument, shortening its life and compromising sonic fidelity, particularly on the road. The GA250 Ukulele Humidifier is a cost-effective investment in your instrument's looks, longevity and, of course, sound. The GA250 can be stored conveniently and unobtrusively by suspending it between your strings in the sound hole. The sponge-style humidifiers dispense moisture evenly without ever contacting the instrument itself, ensuring it looks and sounds as good as the day you bought it.

Specifications

Application: Ukulele
