

Utility Cart Handle Bag

UCB1250 / 14827

NEW PRODUCT

Features and Benefits

An ingenious add-on to the UTC2200 or UTC5500 utility carts, the UCB1250 Utility Cart Handle Bag increases a cart's available loading options, providing three separate pockets for ease of organizing, transporting, and accessing small devices, tools, and supplies. There's no need to make extra trips for small accessories because the bag securely fastens to a cart's handlebar, leaving the cart bed free to accommodate a full load of gear. Heavy-duty nylon construction ensures reliable performance while a top flap on each pocket keeps contents in place and protects them from the elements.
