

Shock Mount

MY440 / 14915

Features and Benefits

For more professional-sounding recordings, the MY440 Shock Mount for Studio Mics provides elastic suspension that isolates mics from external causes of rumble. The sturdy adapter mounts to standard mic stands and booms while the suspended clamp securely holds a wide range of large-diaphragm condenser mics. The clamp angle adjusts and locks in place with a tightening knob for precise mic positioning. EVA lining on the clamp protects the mic finish and delivers a nonslip grip for reliable mic support.

Specifications

- Application:** Isolates mics from external vibration
- Clamp Diameter:** Fits mics 48–54 mm in diameter
- Mounting Socket Threading:** 5/8"-27
- Construction:** Steel / elastic
- Color:** Black
