

Electro-Voice SX80 Loudspeaker shown

MultiMount™

Pan and Tilt Speaker Mount

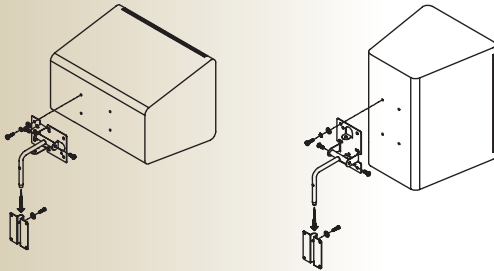

The MultiMount-016 quickly mounts and aims loudspeakers weighing up to 20 lbs./9 kg. to walls, from ceilings, overhangs and other structural surfaces. Three separate rotational axes make aiming fast, versatile and permanent.

The MultiMount's unique support arm acts as a convenient carrying handle to help lift the speaker into place. Once inserted, the wall plate supports the weight of the loudspeaker for hands free wiring and aiming.

MultiMounts are built from tough alloy metals to assure reliable permanent installations. Black and white paint finishes are available, packaged two per carton along with a variety of assembly hardware. Factory made safety cables are also available separately.

MultiMount-016 fits standard 2.00" x 4.25" and 2.75" x 5.00" mounting patterns:
