

Signal-Safe™ IEC Power Cords

Signal-Safe™ IEC Power Cords replace the standard power cords provided with electronic components, and are available in multiple sizes, with standard or low profile, 90° angled plugs.

- Save space at the back of the rack
- Constructed of 14 gauge wire
- Provides a cleaner, more organized installation
- Eliminates slack and loops caused by long power cords
- Signal-Safe™ design incorporates twisted wires to minimize disruptive AC magnetic fields
- Multiple length cords available to meet the needs of each situation
- UL listed in the US and Canada

NEW Signal-Safe™ Design incorporates tightly twisted conductors to virtually eliminate AC magnetic fields

NEW Low-profile, 90° angled plugs are available in left or right hand orientations
