

GXF-10

Smaller, lighter, and more energy efficient. Our new GXF-10 power supply, a replacement for our WXF and WXF-10 transformer, has a six-foot cable terminating in a 2.1mm plug.

This 12-volt, 1 Amp power supply will power up to two High-Intensity goosenecks (use our WYE cord) or up to four Low Intensity or LED goosenecks (use the Pye cord).
