

Dual-Screen Pop Blocker

ASFSS6-GB / 52746

Features and Benefits

The ASFSS6-GB Dual-Screen Pop Blocker is a pop filter that removes unwanted "P" and "B" plosives by providing open space between the two screens. The first screen diffuses the air burst that causes plosive consonants; the open space between the screens disperses air pressure; and the second screen diffuses the air again and removes remaining plosive sounds. The 11.5" gooseneck allows for precise positioning of the Pop Blocker without making noise.

Specifications

Application: Improves vocal recordings

Vertical Height: 6"

Clamp: C-Clamp with 11.5" Gooseneck

Construction: Dual Nylon Screens

Color: Black
