## RPS Series Remote Power Control

The new RPS Series Remote Power Control provides the ability to power complete 15 Amp systems on and off without the need to access equipment. Perfect for installations where it is desirable to keep users from having the ability to make any adjustments, the RPS Series Power control mounts in the face of select racks, and is also available to mount in a single space panel or UCP Series Universal Connector Panel. Available keylocked when security is a concern, or a switched model for non-secure areas, the RPS has been tested in the most demanding situations and is UL Listed in the US and Canada for safety. The RPS fits in any Decora® opening, features removable ears and can also be mounted to any flat surface.

DWR, SR, and ISRK Series enclosures feature Decora® knockouts for mounting of the RPS Series Remote Power Control without the need for any additionally accessories.
