

Product Details

e 965

Short Description

The e 965 is Sennheiser's first large-diaphragm, true condenser handheld microphone. The innovative 1" dual-diaphragm capsule means you can access both cardioid and supercardioid polar patterns with the flip of a switch. Ideal for every vocal application, the e 965 truly combines the sensitivity of a world-class studio condenser with the ruggedness our customers demand from a Sennheiser evolution stage microphone.

Features

- Switchable pick-up pattern (cardioid / super-cardioid)
 - Low-cut switch, which reduces ambient noise, rumble , and wind noise
 - Switchable pre-attenuation (-10 dB) accommodates singers with powerful voices
 - Capsule shock-mount efficiently rejects handling noise for superbly clear sound
 - Excellent protection against moisture
 - Astounding frequency response of 40-20,000 Hz
 - An unbeatable 10-year warranty!
