

A400SM, A400XLR, A400SMXLR and A99SMA Shock Mounts

The A400SM, A400XLR, A400SMXLR and A99SMA are accessories that allow permanent installation of a quick-release shock mount for use with a wide variety of gooseneck microphones.

The **A400SM** Shock Mount employs Shure Shock-Stopper™ construction, which decouples the microphone from the mounting surface and reduces the transmission of impact or surface noise by up to 20 dB.

The **A400XLR** assembly consists of a 3-pin XLR-type (female) connector and insert. Existing A400SM Shock Mounts can be retrofitted for quick release performance with the A400XLR Connector/Insert.

The **A400SMXLR** packages the A400SM Shock Mount with the A400XLR Connector/Insert.

The **A99SMA** Adaptor allows the A400SM Shock Mount to be used in installations sized for use with the A99SM Shock Mount.
