

# AmeriQuad

Using Pro Co's 424BK (4-conductor, 24 gauge, 96% braided shield, Kevlar in the core) wire, and bi-wire technology, AmeriQuad is our premium cable for church systems, touring sound systems and other situations where high RFI fields may present a noise problem. The bi-wire technology adds up to 20 db more noise rejection than a regular 2-conductor cable (it acts like much less of an antenna to the system). Needed where "Come back, good buddy!" and other such annoying problems must be avoided at all costs.

- Reduces system noise considerably
- Black Neutrik connector, gold contacts
- Lays down flat, easy to coil
- 20 year warranty

| <b>Model Number</b> | <b>Length in Feet</b> |
|---------------------|-----------------------|
| AQ-5                | 5                     |
