

CRANK-UP LIGHTING STAND

LS9900B

FEATURES AND BENEFITS

Give your lights a lift with the LS9900B Crank-Up Lighting Stand. This portable yet sturdy rig makes it easy to set up and tear down tall lighting and speaker configurations in theaters, outdoor venues, and other performance spaces. The stand adjusts in height and your settings are reinforced with the included locking pin to ensure safe, secure, reliable equipment support. For ergonomic setup and teardown, this stand raises and lowers the upper shaft via a hand-cranked ratcheting winch, making it much easier for you to fully elevate and safely lower your heavy equipment. At the top of the shaft a horizontal T-bar holds your light fixtures with four available mounting spaces that accept PAR cans, LEDs, spots, lasers, projectors, moving heads, and other effects. With its lengthy legs, the braced tripod base is a solid foundation, moreover, nonslip rubber feet absorb vibrations and prevent slides and skids to firmly keep the stand where you want it. Durable finished in classic black and plain steel, the stand looks great, resists chips and scratches, and blends into your livestream, stage, or studio setup to add to a professional presentation. For compact storage, efficient transportation, and ease of load in and load out, the T-bar can be detached and the tripod base folds down.
